

# MIS Doctoral Dissertations: 1986

By: **Scott Hamilton**  
**Blake Ives**  
**Gordon B. Davis**

## Editor's Note

*Every year for the past five years the MIS Quarterly has published a listing of recent MIS dissertations. The initial list covered MIS dissertations written between 1973 and 1980 and has been updated annually to provide a complete, up-to-date index of the MIS dissertation literature.*

*The method used for identifying dissertation titles was previously described and validated.<sup>1</sup> Although this method ensures identification of most MIS dissertations, there will be occasional oversights. Undoubtedly, there are some we have missed this year and still others from previous years. We encourage additions to the bibliography.*

This year's list includes 98 dissertations. Copies of the dissertations may be obtained through University Microfilms.

Abstracts of the dissertations are found in Dissertation Abstracts International which is available in most university libraries.<sup>2</sup> The 500 to 1,000 word abstracts provide a short description of the research topics, research methodology, and findings.
