Editor's Note

Each year the *MIS Quarterly* publishes a listing of MIS dissertations written during the previous year. This list of titles is updated annually to provide a complete, up-to-date index to the MIS dissertation literature.

The method used for identifying dissertation titles was previously described and validated.[1] Although this method ensures identification of most MIS dissertations, there are occasional oversights. Undoubtedly, there are some we have missed this year and still others from previous years. We encourage additions to the bibliography.

This year's list includes 143 dissertations. Copies of the dissertations may be obtained through University Microfilms. University Microfilms can be reached at:

   University Microfilms International
   Dissertation Copies
   P.O. Box 1764
   Ann Arbor, Michigan 48106
   (800) 521-3042

Abstracts of the dissertations are found in Dissertation Abstracts International,[2] which is available in most university libraries. The 500 to 1,000 word abstracts provide a short description of the research topics, research methodology, and findings.
