## Editor's Note:

Each year the *MIS Quarterly* publishes a listing of MIS dissertations to provide a complete, up-to-date index to the MIS dissertation literature.

The method used for identifying dissertation titles was previously described and validated.<sup>1</sup> Although this method ensures identification of most MIS dissertations, there will be occasional oversights. Undoubtedly, there are some we have missed this year and still others from previous years. We encourage additions to the bibliography.

This year's list includes 126 dissertations. Copies of the dissertations can be obtained through University Microfilms at the following address:

University Microfilms International  
Dissertation Copies  
P.O. Box 1764  
Ann Arbor, Michigan 48106  
(800) 521-3042

Abstracts of the dissertations are found in Dissertation Abstracts International, which is available in most university libraries.<sup>2</sup> The 500 to 1,000

word abstracts provide a short description of the research topic, research methodology, and findings.

## Dissertation Bibliography

- Alanis, M. *A Simulated User for Laboratory Investigation of Information Systems Requirements Determination*, University of Minnesota, 1990.
- Alfano, J.A. *A Technique to Improve the High-Level Designs of Novice Developers*, Polytechnic University, 1990 (90-18396).
