Editor's Note:

Each year the *MIS Quarterly* publishes a listing of MIS dissertations to provide a complete, up-to-date index to the MIS dissertation literature.

The method used for identifying dissertation titles was previously described and validated.¹ Although this method ensures identification of most MIS dissertations, there will be occasional oversights. Undoubtedly, there are some we have missed this year and still others from previous years. We encourage additions to the bibliography.

This year's list includes 87 dissertations. Copies of the dissertations can be obtained through University Microfilms at the following address:

University Microfilms International
Dissertation Copies

(800) 521-3042

Abstracts of the dissertations are found in Dissertation Abstracts International, which is available in most university libraries.² The 500 to 1,000 word abstracts provide a short description of the research topic, research methodology, and findings.
