

# MANAGEMENT INFORMATION SYSTEMS QUARTERLY

## Table of Contents

June 1982

Volume 6, Number 2

EDITORIAL PREVIEW .....	ii
-------------------------	----

### APPLICATION

"Critical Success Factors of Chief MIS/DP Executives," E. W. Martin, University of Indiana .....	1
---	---

*Explores the critical success factors of a group of chief MIS managers  
in successful organizations.*

"Information Technology in the 1990s: A Long Range Planning Scenario," Robert I. Benjamin, Xerox Corporation .....	11
---	----

*Describes a reasonable scenario for information technology, and its  
use within a major organization in the year 1990.*

"Approaches to Strategic Planning for Information Resource Management (IRM) in Multinational Corporations," Gad J. Selig, Contel Information Systems .....	33
--	----

*Presents conclusions and recommendations based on an examination  
of the IRM planning and coordination practices of 25 large MNCs as  
well as reviewing two case studies.*

### THEORY AND RESEARCH

"Chargeback Systems and User Involvement in Information Systems — An Empirical Investigation," Margrethe H. Olson, New York University and Blake Ives, Dartmouth College .....	47
--	----

*Examines in a field study the relationship between various  
characteristics of a computer chargeback system, the quality of the  
chargeback system's user interface, user involvement, and user  
attitudes about information systems services.*

"Human Information Processing in Information and Decision Support Systems," Daniel Robey and William Taggart, Florida International University .....	61
--	----

*Investigates the relevance of human information processing to the  
development and use of computer based information and decision  
support systems.*
