

# MANAGEMENT INFORMATION SYSTEMS QUARTERLY

## Table of Contents

March 1980

Volume 4, Number 1

EDITORIAL PREVIEW .....	ii
-------------------------	----

### APPLICATION

"Integration of Algorithmic Aids Into Decision Support Systems," L. C. Barbosa, IBM Research Laboratory, and R. G. Hirko, IBM Research Laboratory .....	1
<i>Provides a set of guidelines for a system designer with the aim to improve the interface, feedback, flexibility, and control of an integrated system.</i>	
"MIS Design: A Contingency Approach," Richard J. Schonberger, University of Nebraska—Lincoln .....	13
<i>Identifies six MIS design approaches, justification for their use, leading to a contingency model dependent upon the type of decision making.</i>	
"Impact of Organizational Maturity on Information System Skill Needs," Izak Benbasat, University of British Columbia, Albert S. Dexter, University of British Columbia, and Robert W. Mantha, Laval University .....	21
<i>Presents results of a study which analyzes skills perceived as useful by information systems managers and systems analysts in IS organizations of different levels of maturity.</i>	
"Information Systems Skill Requirements: A Survey," Paul H. Cheney, Iowa State University, and Norman R. Lyons, Naval Postgraduate School .....	35
<i>A survey of 32 of the nation's largest public and private organizations to project data processing personnel needs and to analyze the skill requirements in various positions.</i>	

### THEORY AND RESEARCH

"The Impact of Some MIS Design Variables on Managers' Evaluations of Subordinates' Performances," Michael Firth, Victoria University of Wellington .....	45
<i>Reports results of an experimental analysis of the impact of MIS design variables on managers' evaluations of subordinates' performances.</i>
