

MANAGEMENT INFORMATION SYSTEMS QUARTERLY

Table of Contents

December 1977

Volume 1, Number 4

EDITORIAL PREVIEW	iii
 INTERVIEWS	
Norman Lorentzsen, President, Burlington Northern, Inc.	1
Robert G. Stevens, Chairman and President, BancOhio Corporation	5
 APPLICATION	
"MIS Problems and Failures: A Socio-Technical Perspective Part II: The Application of Socio-Technical Theory," Robert P. Bostrom, Indiana University and J. Stephen Heinen, University of Minnesota	11
<i>A case study in which the Socio-Technical-Systems (STS) process in system design is used to show how systems can be made more user oriented while being technically efficient.</i>	
"RAFT: An Information System for Fiscal Analysis," James C. Johnson, University of Minnesota Computer Center, Kenneth A. Kozar, University of Saskatchewan and David A. Ruch, RAFT Project — University of Minnesota	29
<i>A description of the building of an information system for state fiscal planning coupled with an analysis of the system building process.</i>	
 THEORY AND RESEARCH	
"The Organizational Context of User-Centered Software Designs," Rob Kling, University of California — Irvine	41
<i>Programs can be written and systems designed which are friendly to potential users. This paper provides the theory underlying these types of information system designs.</i>
